iWeb - Homepage - Sites

While there are a number of different free web site host options, we have not found one in New Zealand that we can recommend. We wanted hosting that will just work with iWeb, change a few settings once, then click publish. To enable this we have decided to organise a bulk purchase for web hosting that does just work, you can now purchase this through iLike computing limited. It's in New Zealand, this means it is a lot faster than MobileMe, quick to update, and a lot faster for your local visitors to browse. There are a few minor iWeb features that don't work, allowing comments on your Blog posts is one, but we are working on alternatives. Sadly nothing fully matches MobileMe's features.

Hosting Fee per year		inc G.S.T
50 MB	\$50.00	\$57.50
100 MB	\$85.00	\$97.75
200 MB	\$140.00	\$161.00
1,000 MB	\$220.00	\$253.00

We can also create custom accounts if these sizes don't fit your needs. There are no additional traffic costs, just this flat annual fee.

To be eligible for our hosting, if you represent a school or business then we will require an annual Web Site workshop

for your staff, if you are an individual then you need to have purchased your Mac from us.

We are very pleased to have found a great, affordable, alternative for our customers. Please, don't wait for your web site to disappear from the internet before doing something about moving it.

Call us to book your site!

Chris and Kevin
