New to Dunedin...
...but not new to Apple

Chris and Kevin Bracey started in the computer industry in 1982. From Apple II to the Macintosh, iMacs to iPads, our knowledge and experience with Apple products is both broad and deep.

New to your school...
...but not to education

Fourteen years ago we established a business specialising in ICT in schools. We've worked the length of the West Coast developing a wide range of support and services in partnership with schools.

Back in 1998 there was no broadband. Networks were new. We've all come a long way! We have travelled the ICT journey along with our schools; planning, implementing, transitioning, upgrading, and most importantly empowering teachers to include quality ICT in their classroom practice.

With our expertise in distance support we have now expanded into Otago, and look forward to being part of your school's technology journey.

For fourteen years we've been delivering real results in real schools.

You're welcome to talk with our partner schools about how much they value our contributions to their ICT strategy. Here are some of the schools that we've been working with for over a decade.

Kaniere School – 03 755 6813

Principal – Lorraine Alexander,

INTRODUCING

Authorised Education Reseller

The arrival of the iPad heralds new and effective technologies.

In a world full of geek-speak and internet hype, iLike computing provides an invaluable service to schools, monitoring the effectiveness of new technologies, translating the marketing, and keeping a close eye on the big picture – how all your tools work together to deliver on your school's charter and your ICT objectives.

It doesn't matter what kind of server you've got, what level of network management, or how skilled your staff, the education landscape has profoundly changed over the

"I'm just amazed at how much my five year old knows! Whatever we're talking about, she can just look things up with her iPad and be part of the conversation!"

— Jude Taft
School Administrator

last few years. Teaching and learning in a device-rich environment is a new experience for all of us.

Most importantly, iLike is committed to developing motivated, autonomous, life-long learners – staff as well as students.

iLike Services

On-site and distance support – a firm foundation for teacher confidence in the classroom: technology that "just works"

PROFESSIONAL DEVELOPMENT

Whole school workshops, focus groups or one-on-one training. Teachers don't have to know it all, but they do have to know what learning outcomes to expect of their students and to become personally confident in their digital environment. Changing technologies require constant refreshment of skills.

CLASSROOM MODELLING

Chris can bring her 15 years experience working with teachers and students to your classrooms, modelling the effective use of technologies to support curriculum objectives.

DEPLOYMENTS & UPGRADES

The number of devices in your school is growing exponentially. We can assist with infrastructure and deployment as well as training, resourcing and empowering your ICT lead staff.

APPLE PRODUCTS

While we would love to be your preferred Apple supplier, you may already have a contract, or even a great relationship with another Apple Reseller. Or you may be an "Apple orphan". Don't worry, we specialise in Apple Support, no matter where you buy your products.
